Western Plains Regional Hospital - Dodge City, KS
Wheaton Franciscan Healthcare - Franklin, WI
Willis Knighton Hospital Medical Center - Shreveport, LA
Wuesthoff South County - Melbourne, FL

“ In my experience, the Allen frame performs comparably to the standard OSI Jackson table for non-instrumented cases, with some additional benefits: It’s smaller, can be adapted to a regular table, folded into a neat unit for storage and is considerably less expensive.¹ ”

**- James J. Lynch, MD, FACS
Director, Spine Service, Regent Surgical Health
Chairman, Director of Spine Nevada and Surgery Center of Reno**

“ The Allen Spine System allows a surgeon to perform spine procedures in an optimal position with no interference of the fluoroscopic imaging required for accurate placement of the Swivel Ports. The Allen Spine extension attachment also offers excellent padding for patients which decreases the likelihood of pressure sores and other complications of lying in a prone position for spine procedures. ”

“ The Allen Spine System is a very good product for an outpatient center because it is cost-efficient for the facility. Because it’s not a whole table and can be attached to the operating table we already have, it is less expensive than competing products.² ”

**- James B. Macon, MD
Director, Framingham-Wellesley Neurological Surgery, Inc.**

“ We at Diagnostic and Interventional Surgical Center have been using the Allen Spine Table for approximately eight months, up to three to four times a week, in procedures such as Posterior Lumbar Fusions and Posterior Lumbar Soft Stabilization Rods. The Allen Table has performed above and beyond our expectations. The table has been very comfortable for our patients and extremely practical for our staff to navigate up or down and very manageable for patient positioning. ”

“ It has performed in exuberance of our prediction. It is a sturdy, very well made table and excellent for use in surgery centers or any operating room, not to mention that it is cost competitive to others like the Jackson Table. We are very pleased to have the opportunity of using the Allen Table in our O.R. ”

**- Robert S. Bray, Jr., MD
Founding Director and CEO, Diagnostic and Interventional Surgical Center**
